

*Partnering With Today's Industries...Ensuring Tomorrow's Future™*

## GENERAL INFORMATION

In today's environment, it's a challenge for any organization to ensure that all internal entities are performing at the maximum efficiency and productivity required to reach their profit goals. But you need more. You need an efficient and cost effective way to keep your facility in compliance with a growing number of regulatory requirements. You cannot afford to do less.

**U.S. Compliance can help.** A fast-growing environmental, health and safety (EHS) compliance services firm, U.S. Compliance specializes in helping companies like yours achieve and maintain compliance while realizing profitable growth and productivity.

**Keep up with the latest government regulations.** We uphold the highest standards of quality in everything we do. Our staff continually works to keep pace with the very latest government regulations and how they apply to the growing and changing needs of our clients.

**Avoid non-compliance lawsuits and fines.** We work in partnership with our clients to find the most effective ways to achieve and maintain compliance for their specific facilities and avoid non-compliance lawsuits and fines. Mutual communication is paramount to the process and a key to the success of our programs.

**Minimize the potential for accidents and injuries.** With more than 20 years of experience in the areas of OSHA and EPA compliance, U.S. Compliance has refined a unique and effective process to minimize the potential for accidents and injuries. Our highly qualified trainers work directly with you at your facility, conducting proactive training sessions that get your employees involved in safety and compliance, boost their interest in each training topic, and improve the working environment.

### IMPLEMENTATION

#### **U.S. Compliance puts you in compliance and keeps you there.**

After an initial site visit for a comprehensive audit, we work with your staff to prioritize the worker safety and environmental compliance actions needed to reach and maintain compliance. Following this phase, you may choose to include the U.S. Compliance Subscription Service, which provides a detailed "Compliance Calendar" with program delivery dates and training schedules for your facility, and a "Safety Compliance Manual" and "Environmental Compliance Filing System" for the documentation and regulatory materials created for your company.

## SAFETY COMPLIANCE PROGRAMS

**Trust the experts at U.S. Compliance.** You can rely on U.S. Compliance to develop a safety compliance program that will be practical to implement and easy to follow. Components of our safety compliance program are likely to include some or all of the following:
