

## DOT HAZARDOUS MATERIALS TRAINING

### Course Description

This half-day DOT training will teach your employees the proper prepping, packaging, placarding and labeling required to ship hazardous materials. Every employee involved in shipping, transporting or handling hazardous materials must receive training to be certified; the training must be repeated at least every 36 months; and the training must be updated whenever there is a regulation change affecting an employee's job duties.

### Who Should Attend?

Employees who:

- Load, unload or handle hazardous materials
- Design, manufacture, fabricate, inspect, mark, maintain, recondition, repair or test a package, container or packaging component that is represented, marked, certified or sold as qualified for use in transporting hazardous material in commerce
- Prepare hazardous materials for transportation
- Are responsible, or who supervise employees responsible, for safely transporting hazardous materials
- Operate a vehicle to transport hazardous materials

### Training Topics Include:

Definition of hazardous materials and HazMat employees, health and physical hazards – chemicals, hazard detection and identification, basic understanding of hazardous materials, requirements during transport, security of hazardous materials in storage and shipment, the hazardous materials table, basic packaging requirements, marking and labeling, placarding, shipping papers, emergency response information.

This program meets the DOT HazMat general awareness requirements for over-the-road transport of hazardous materials (49 CFR Parts 171-178).

## EPA RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) TRAINING

### Course Description

This half-day training will teach your employees how to identify hazardous waste, proper waste management of hazardous and universal wastes, how to complete manifests accurately, and emergency preparedness and release reporting.

### Who Should Attend?

Waste handlers, emergency responders, environmental managers, and anyone else with a basic knowledge of hazardous waste requirements seeking an update and refresher on current hazardous and universal waste requirements.

### Training Topics Include:

Regulation review, identification of hazardous waste, general waste management, special wastes, pretransport requirements, emergency response, release reporting and waste minimization.

This RCRA training fulfills the training requirements under the EPA Resource Conservation and Recovery Act (RCRA) for anyone who generates hazardous waste.
